

# ACOUSTIC BAFFLES & SHAPES

## Description

Acoustic baffles & shapes are the ultimate tool for design freedom. Positioning panels at various angles or clusters offers limitless design flexibility. Using different colors, shapes, sizes and incorporating lighting creates a unique ceiling feature. Hanging panels are perfect for the combination of aesthetics and acoustics to increase sound absorption and noise diffusion in any space.

The panels can be installed in new spaces or used in retrofitted workspaces. This concept takes the interaction between the space, the people and the activity to a new acoustic and aesthetic experience.

A calm and peaceful work environment is a significant factor for improving employee performance. Acoustic baffles and shapes can reduce unwanted noise, resulting in less distraction, clearer communication and maximum productivity.

## Application

- Auditoriums
- Retail Outlets
- Educational Venues
- Health Care Facilities
- Sports Venues
- Restaurants
- Offices
- Public Spaces
- Art Galleries
- Religious Institutions

## Benefits

- Create a multitude of contemporary looks
- Reduces excess noise to create a more comfortable environment
- Allows easy access to ceiling for services
- Enables natural light to come through
- Quickly demountable
- Height can be easily adjusted

# ACOUSTIC BAFFLES & SHAPES

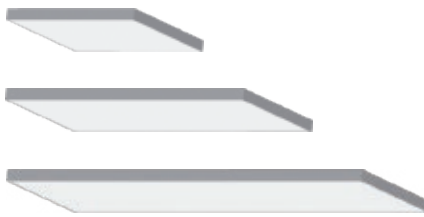

## BAFFLES

Small Baffle: 1200x200x40mm  
 Medium Baffle: 1800x200x40mm  
 Large Baffle: 2400x200x40mm

## SHAPES (Straight)

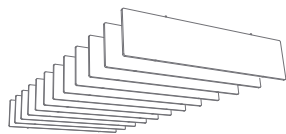

Square: 1200x1200x40mm  
 Medium Rectangle: 1800x1200x40mm  
 Large Rectangle: 2400x1200x40mm

## SHAPES (Circular)

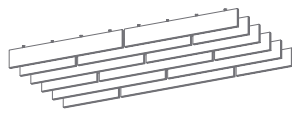

Small Circle: 800mm diameter  
 Medium Circle: 1200mm diameter  
 Large Circle: 1600mm diameter
