

DATA SHEET – STEEL BRANDERS

Supertec offers a variety of ceiling systems, products and accessories to cater for your interior building solutions. This includes various steel ceiling components, boards, tiles, hangers, perimeter trims and accessories. The products we manufacture and represent are subjected to extensive testing and comply with international and local building regulations and standards.

Our steel brandering is manufactured from ISQ 300 steel, is ribbed for improved fixing location and the ends are swaged to eliminate the need for a joiner section.

The branders are fixed with suspension brackets perpendicularly to the roof supports at no more than 400mm centres apart. The suspension brackets may not be more than 1.2m apart to support the steel branders adequately. It is recommended that a 20X20mm galvanised angle is to be installed at the perimeter to support the brander ends. Plasterboard is fixed at a right angle to the branders i.e. parallel to the trusses with 25mm drywall screws at centres not exceeding 150mm.

Item	Length	Amount
Steel Branders	2.7-4.5m	20 / bundle
Suspension Brackets	150mm & 300mm	20 / bundle
